A netet bujva nem talaltam meg csak hozza hasonlo problemat sem, sem leirast, igy hat gondoltam, csinald magad alapon nekilatok a hiba keresesenek es megkiserlem a javitast. Elsokent szemrevetelezve a csatlakozokat, mind az akkumulator mind az adatkabelfenykepezo oldalon nem lattam semmi rendellenes dolgot. Tovabblepve, a gepbe csatlakozo resze a vezeteknek bonthato, 2 kicsi csillagcsavar fogja, ez konnyen kijott, majd a masik vegen 2 rahajlos patentet ovatosan kifeszitve le lehet venni a 2 reszbol allo muanyag burkolatot, igy betekintest enged a kis NYAKra. Elso szemrevetelezesnel semmi erdekeset nem talaltam, par vezerlo IC es egy smd teljesitmenytranzisztor a toltest szabalyozando, ahogy en lattam.

Majd nagyitoval alaposan korbenezve egy smd ellenallast lattam, kozepen egy szep kis lyukkal, de eppen csak akkorat, ami meg nem fedte el a rajta levo erteket R30 atszamolva 160 ohm. Tudom ellenallast az egyik labat kiforrasztva merunk, de ez se igy, se ugy nem mutatott semmit, ergo annyira szetegett, hogy szakadt lett. Smd ellenallas es forrasztoallomas hijan, valamint remeg a kezem, kihuzalozassal beforrasztottam egy masik ellenallast a helyere. A kiprobalas utan jonak bizonyult, viszont mivel csak fel wos ellenallast talaltam ilyen ertekben, a gyari muanyag burkolatot nem tudtam visszarakni. Igy maradt a szigeteloszalaggal korbetekeres, es a 3 szinu lednel pengevel kivagva, celluxot raragasztva, lathato marad a fenyjelzes. Akinek ilyen fenykepezogepe van es talalkozik ezzel a hibajelenseggel tudom javasolni, hogy eloszor a toltoadatkabel vezeteknel nezelodjon. Valoszinunek tartom, hogy valami aramkorlat lehetett ez az ellenallas, mert az osszes

kozul ez volt a legnagyobb, es a vezetosavok idevezeto vastagsaga is erre enged kovetkeztetni. Gondoltam megosztom ezt veletek, es remelem hasznara valik barkinek, aki ilyennel talalkozik.. Petya samsung vpd24i Sziasztok! Segitseget szeretnek kerni.Van egy allig ket eves Samsung Vpd24i videokameram,ami sajnos felvetel modban megadta magat,nincs kepalkotasa a kijelzon elhomalyosodott csikok latszanak.Kerdesem a kovetkezo,hogy erdemese javittatni,vagy adjam el alkatresznek. SAMSUNG PL211 kijelzo nem mukodik Sziasztok! Az objektiv kiugrik, vaku meg a zoom mechanika megy, zold led neha villog a hatlapon. A kijelzo viszont halott. Halvany, alavilagitas nelkuli kep sem latszik rajta. Feltetelezem, hogy a kijezo ledes elvilagitasu LCD, nem valami oled pixeles ujdonsag. Mihez kezdjek vele Kene valami javitasi tipp. Nem akarom nagyon szetbabralni, nem az enyem. Van egy Samsung d60as tipusu fenykepezogepem ami azt csinalja ha beteszem a zsir uj elemet kb 5 kepet keszitek vele es le is merult.

Szerintetek, hogyan tudnam megtalalni a szivargast. Tippem egy elko ami szivarog de vajon hogyan deritsem fel melyik az. Mit javasoltokYou can write in English language into the forum not only in Hungarian. Set up the camera driver Before connecting the camera to a PC, via the USB cable, you will need to set up the camera driver. Install the camera driver that is contained in Application software CDROM. p.79 Take a picture Take a picture. p.16 Insert the USB cable Insert the supplied USB cable into the PC's USB port and the camera's USB connection terminal. p.81 Check the cameras power Check the camera's power. Page 3 Danger Warning DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury. WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury. Do not attempt to modify this camera in any way. To do so may result in fire, injury, electric shock or severe damage to you or your camera.Page 4 Caution CAUTION indicates a potentially hazardous situation which, if not avoided, may result in a minor or moderate injury. Leaking, overheating, or damaged battery could result in fire or injury. Use battery with the correct specification for the camera. Do not short circuit, heat or dispose of battery in fire. Do not insert the battery with the polarities reversed. Remove the battery when not planning to use the camera for a long period of time. The batteries are listed below. Non rechargeable batteries 2 X AA Alkaline High Capacity Rechargeable batteries Optional SNB2512 NiMH Refer to page 16 for more information about the camera mode setting. Page 14 Instructions on how to use the memory card If the memory card is subjected to any of the following, the recorded data may become corrupted When the memory card is used incorrectly. If the power is switched off or the memory card is removed while recording, deleting formatting or reading.

Samsung cannot be held responsible for lost data. It is advisable to copy important data onto other media as backup e.g. floppy disks, hard disks, CD etc. Selecting the automatic mode will configure the camera with optimal settings. Digital Image Stabilisation DIS mode. This mode will reduce the effect of camera shake and help you get a wellexposed image in dim conditions. This also enables the user to practice the best way to take the pictures. Page 20 Starting the recording mode How to use the Portrait mode Please select this mode for quick and easy portraits. Select Portrait mode using mode dial. Page 21 Starting the recording mode How to use the Movie clip mode A movie clip can be recorded for as long as the available recording time of the memory capacity allows. 1. Select the Movie clip mode by rotating the Mode dial. The Movie clip mode icon and available recording time will display on the LCD monitor.. 2. Point the camera towards the subject and compose the image by using the LCD monitor. 3. Page 22 Things to Watch Out for When Taking Pictures Pressing the shutter button down half way. Lightly press the shutter button to confirm focus and flash battery charge. If the menu is not displayed, this button works as the OPTICAL ZOOM or DIGITAL ZOOM button. This camera has a 3X optical zoom and a 3X digital zoom function. Using both will offer a total zoom ratio of 9X. To view a clearer digital zoom image, press the shutter button halfway at the maximum optical zoom position and press the zoom T button again. Page 25 Face DetectionFD button Face DetectionFD This mode detects the face position of the subject automatically and then

sets the focus and exposure. Select this mode for quick and easy face picture. The distance ranges are shown below. Press the Macro button until the desired macro mode indicator appears on the LCD monitor. When the menu is not displayed on the LCD monitor, the LEFT button operates as the FLASH button.

If a subject or background is dark, the camera flash will work automatically and will reduce the redeye effect by using the redeye reduction function. The flash fires regardless of the available light. When the menu is not displayed on the LCD monitor, the RIGHT button operates as the Selftimer button. This function is used when the photographer would also like to be in the image. If you operate the Selftimer button during the selftimer operation, the selftimer function is cancelled. Use a tripod to prevent the camera from shaking. Pressing it again will return the LCD to the initial display. A menu option can be displayed when the following are selected MOVIE CLIP and STILL IMAGE mode. There is no menu available when the voice recording function is selected. Page 33 E Effect button It is possible to add special effects to your images by using this button. Even if the camera is turned off, the effect setting will be preserved. Page 36 Sharpness If you cannot obtain suitable exposure conditions, you can change the metering method to take brighter pictures. You can adjust the sharpness of the picture you are about to take. Page 37 ISO White balance You can select the ISO sensitivity when taking pictures. The speed or specific lightsensitivity of a camera is rated by ISO numbers. Page 38 White balance Exposure compensation Using the Custom White Balance White balance settings may vary slightly depending on the shooting environment. You can select the most appropriate white balance setting for a given shooting environment by setting up the custom white balance. This camera automatically adjusts the exposure according to the ambient lighting conditions. You can also select the exposure value by using the Fn button. Page 39 Recording O You can use the menu on the LCD monitor to set up recording functions. The items indicated by are default settings. Page 57 E Effect button Resize Change the resolution size of pictures taken. Page 58 E Effect button Colour You can rotate the stored images by various degrees. Page 59 E Effect button Colour Custom colour You can change the R Red, G Green and B Blue values of the image. Page 60 Setting up the play back function using the LCD monitor PLAY mode functions can be changed by using the LCD monitor. In the PLAY mode, pressing the MENU button displays the menu on the LCD monitor. The menus you can set up in Play mode are as follows. To capture an image after setting up the play menu, press the PLAY mode button or shutter button. All Pics Sub Menu Secondary Menu Page p.60 Auto All Date Select p. Page 61 Setting up the play back function using the LCD monitor Menu Tab Main Menu Type Quality. Page 63 Starting the Multi Slide Show Playback o Setting play interval Voice memo Set the Multi Slide Show play interval. Page 64 Playback o Deleting images Protecting images This deletes images stored on the memory. This is used to protect specific shots from being accidentally erased Lock. It also unprotects images that have been previously protected Unlock. Of all the files stored in the memory card, the unprotected files in the DCIM subfolder will be deleted. Remember that this will permanently delete unprotected images. Important shots should be stored on a computer before deletion takes place.

Page 65 Playback o DPOFDigital Print Order Format allows you to embed printing information on your memory card's MISC folder. Select the pictures to be printed and how many prints to make. The DPOF indicator will display on the LCD monitor when an image that has DPOF information plays back. Images can then be printed on DPOF printers, or at an increasing number of photo labs. This function is not available for Movie clips and Voice recording files. Page 68 PictBridge You can use the USB cable to connect this camera to a printer that supports PictBridge sold separately and print the stored images directly. Page 69 PictBridge Picture Selection PictBridge Print Setting You can select images you want to print. You can select the Paper Size, Print Format, Paper Type, Print Quality, Date Print, and File Name Print menus for printed pictures. Page 70 PictBridge Reset Important notes Initialises userchanged configurations. Be sure to observe the following precautions. A Default print setting varies depending on the printer manufacturer. For your printer's default setting, refer to the user's guide that came with your printer. This unit contains precision electronic components. Do not use or store this unit in the following locations. Areas exposed to severe changes in temperature and humidity. Areas exposed to dust and dirt. Page 71 Important notes If you use this camera in wet places, such as beach or pool, do not let water or sand get inside the camera. Doing so may result in failure or may permanently damage the unit. Extremes in temperature may cause problems. If the camera is transferred from a cold to a warm and humid environment, condensation can form on the delicate electronic circuitry. If this occurs, turn the camera off and wait for at least 1 hour until all moisture is dispersed. Before connecting the camera to the PC, you should first install the camera driver. Camera driver This enables images to transfer between the camera and PC.

This camera uses the USB Storage Driver as the camera driver. You can use the camera as a USB card reader. Page 80 Setting up the application software To use this camera with a PC, install the application software first. After this has been done, the stored images in the camera can be moved to the PC and can be edited by an image editing program. 2. Install the camera driver, DirectX, Samsung Master and Adobe Reader by selecting a button shown on the monitor. If a recent version of DirectX has been installed on your computer, DirectX may not be installed. You can visit the Samsung website through the internet. Page 81 Setting up the application software 3. After restarting the computer, connect the PC to the camera with the USB cable. 4. Turn the camera power on. If the download window of Samsung Master opens after starting Samsung Master, the camera driver was set up successfully. In this mode, you can download stored images to your PC

through the USB cable. Camera settings for connection 1. Turn on the camera 2. Connect the camera and computer with the supplied USB cable. 3. Turn on the computer. The image files will then be displayed. Page 84 Starting PC mode 4. A popup menu will open. Page 85 Removing the removable disk Windows 98SE 1. Check whether the camera and PC are transferring a file. If the camera status lamp blinks, please wait until the lamp has finished blinking and is constantly on. 2. Unplug the USB cable. If the camera status lamp blinks, please wait until the lamp has finished blinking and is constantly on. 2. Page 86 Removing the USB Driver for Windows 98SE 1. A USB Driver for MAC is not included with the software CD as MAC OS supports the camera driver. 2. Check the MAC OS version during startup. To remove the USB driver, refer to the process shown below. 1. Connect the camera to your PC and turn them on. 2. Page 87 Samsung Master You can download, view, edit and save your images and movies with this software.

This software is only compatible with Windows. Page 88 Samsung Master Image viewer You can view the stored images. Image edit You can edit the still image. 05 SOFTWARE Image viewer functions are listed below. I Menu bar You can select menus. File, Edit, View, Tools, Change functions, Auto download, help, etc. I Image selection window You can select the desired images in this window. Media type selection menu You can select image viewer, image edit and movie edit functions in this menu. Page 89 Samsung Master Movie edit You can get the still image, movie clip, narration, music files together in a movie clip. Movie clip edit functions are listed below. Page 90 FAQ Please check the following if the USB connection malfunctions. USB cable is not connected or it is not the supplied USB cable. Connect the supplied USB cable. Case 2 The camera is not recognised by your PC. Install the camera driver correctly. Turn off the camera, remove the USB cable, plug in the USB cable again, and then turn on the camera. Case 3 There is an unexpected error during file transfer. Visit the following site for downloading the DirectX. Page 92 Correct disposal of batteries in this product Correct disposal of batteries in this product Applicable in the European Union and other European countries with separate battery return systems. To protect natural resources and to promote material reuse, please separate batteries from other types of waste and recycle them through your local, free battery return system. The rechargeable battery incorporated in this product is not user replaceable.
