

2. Wrench for leveling.  
3. Clamp for drain hose.

**On the back of the washer:**

- hot and cold water connections
- power cord with label warning to remove transportation bolts
- two AQUASTOP® hoses (remove hoses from clips on back of washer for installation)

Power cord    hot water    cold water

**Dimensions**

a = 27.0 inches (686 mm)  
b = 32.7 inches (830 mm)  
c = 37.0 inches (940 mm)  
d = 18.0 inches (457 mm)  
Door opening angle: 80°  
Approx. weight = 220 lbs (100 kg)

**Installation area**

**WARNING**

Never ground the washer to plastic plumbing lines, gas lines or hot water pipes.

This appliance must be installed on a solid floor and well leveled due to the higher spin speeds available. If installing the machine on a wood floor over a basement or on a second floor, the floor may need to be reinforced. Sound, vibration, and risk of "walking" will be affected depending on the structure and stability of the floor surface where it is installed.

If the washing machine is to be installed on a weak wood floor consider the following:

- Soft floor surfaces, such as carpets or surfaces with foam backing, are not suitable. If possible, place the washing machine in a corner of the room.
- Screw a water resistant wooden board (at least 3/4" thick) to the floor.
- Secure the feet of the washing machine with holding brackets. Order the holding brackets (set) from Bosch Customer Service (WMZ 2200).

**Useful tools**

The following tools are helpful:

- Flat head screwdriver
- Socket wrench (1/2" / 13 mm)
- Closed wrench (1/2" / 13 mm)
- Bubble Level

**Checklist for Installation**

Installation	Page
completely remove 4 shipping bolts and move the washer into place	8
connect the water supply lines and drain pipe	9
connect the electrical power	10
slide the washer into its final location	10
level the washer as low as possible	10
before first use, run a cleaning cycle	13

**Pedestal Mounting Kit**

9 inch pedestal accessory number  
**WTZ 1295** for solid white color  
**WTZ 1295S** for solid silver color  
**WTZ 1295P** for duo tone silver/white  
 15 inch pedestal accessory number  
**WTZ 1500** for solid white color  
**WTZ 1500S** for solid silver color  
**WTZ 1500C** for duo tone champagne/white  
**WTZ 1500P** for duo tone silver/white

If mounting the washer on the pedestal follow the instructions supplied with the pedestal.

Install pedestal prior to removing transport bolts.

**Clearance**

If installing the washer in a closet, observe the minimum distances according to the following table:

Minimum Installation Clearances	
	Clear
Sides	1 1/4" (32 mm)
Top	12" (305 mm)
Rear	2 1/2" (64 mm)
Front	1 1/4" (32 mm)
Ventilation:	
Top:	48 sq. in. (310 sq. cm)
Bottom:	24 sq. in. (155 sq. cm)

**Notes:**

- Units are not designed to be stacked.
- Units are not designed for under counter installation.

If you operate an older device, Adobe Acrobat Reader is available as It has been reliable but nothing outstanding. It needs to be aired out from time to time because it starts to smell. This is the first time Ive had electrical problems. It wont give me a error code but will not start the drying process.The timer advances 5 minutes.then jumps again as much as 45 min.them counts down after 3 minutes, then to 000. It will restart immediately just fine.Some service info is available, pretty accurate, Well engineered and built, in this Electronics Engineers opinion! Main washer failure was a blown apart water pump, which glass or other object damaged it. Looking for whole front panel disassembly method, to clean it to be safer. Also cleaning all ducting in 100% of the dryer exhaust path. Because drying s weaker lately. If it was an Element failure, likely some Error Codes would show. Instead I am going to use a clamp on AC Ammeter to verify something near the 22A rating, would mean the heating element is OK.Please describe repair issue you are having. Any earlier repairsPosts should beThe website operator reserves the right to reject or edit or deleteYour submission signifies agreement to the above and that you agree to grant an exclusive,You also grantUnfortunately, the value could be as much as 25% off from the manufacturer stated capacity.The edge where bottom connected to the wallThe end of the drum is not clearly marked andFinally, there are baffles inside the drum used for tumbling clothes.Do not confuse the size of the the door opening with the size of the drum. Learned two things 1. Too much. My machine is less than a year old so I called the authorized Bosch repair service.

<http://esxpublishers.com/images/canon-powershot-a2500-user-s-manual.pdf>

I have replaced pumps in washers, but hey it still under warranty.. I have tried running the drain cycle and that doesnt work either. Hello, Welcome to FixYa.I did all the troubleshooting things in the

manual and spoke to a Bosch technician over the. Hopefully the info below will supply you with the assistance to get the door open for now at least.and a little more with some luck. The door. I closed it again, preceded to select a wash cycle, an E started flashing on. Answer questions, earn points and help others. I get my most wanted eBook Many thanks If there is a survey it only takes 5 minutes, try any survey which works for you. Send a Houzz Gift Card. It fills then drains immediately on all cycles. I have only used HE detergent, in lesser amounts than recommended in manual and on machine. Called Bosch and representative said only to use 1 to 2 tablespoons. Well, they should have put that in the manual then. Also, wire spring around gasket has been coming off since the first month. Please help!

No error codes appear, it just fills, drains, then shuts itself off. They are barely off the page. I have found on the web that for earlier models there is a reset code for Bosch washers. It requires one to get into the programing section of the controls. I have read the Bosch manuals which you have so generously posted and do not see anything for this washer. My washer reads out an error code of E01 and then in the programing section also reads out code C00. Your manual indicates that there is a child interlock function on page 25 or 26. This process has not returned the door lock to normal operation. The manuals you have referenced do not seem to give pages 25 and 26. Do you have any thoughts on this problem It makes small hole in all of our tshirts. We ran a stocking around the drum and found rough spots which we removed with a diamond bit. Still have the problem. Anyone else with the same experience. 5 he Bosch tech says get a new drum but I dont want a repeat. BTW my 3 yr old Bosch dishwasher is on its 2nd recall. Never gonna buy Bosch again. Fortunately my mold was mainly on the bottom where the drain holes are and not around the whole seal. I also recently discovered that liquid detergent contains animal fat and have switched back to an HE compatible powder Tide. I cannot believe how much cleaner my clothes are, how sheets no longer get a slightly rancid smell when theyve been sitting in the cupboard for awhile, and how much cleaner my washer looks and smells. I will never go back to liquid detergent. Please email service manual so I can run diagnostic test. Is it possible to post a link to their manuals.Will send on the manual. I would greatly appreciate it. Display is reading E. No number code afterward. Signal keeps beeping and door is locked and cannot unlock it.Back when I had mine, it locked and I couldnt get it unlocked. Dont remember if a error code displayed or not. Any way, the repairman told me to unplug it for awhile and that took care of it.

[www.davidwoodpersonnel.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c43fe44ed9---campbell-hausfeld-product-manuals.pdf](http://www.davidwoodpersonnel.com/wp-content/plugins/formcraft/file-upload/server/content/files/1626c43fe44ed9---campbell-hausfeld-product-manuals.pdf)

Repair man replaced door lock and now I get nothing. Repairman cant come back for four days.I have gotten an E04 error twice In the last few months, so believe I should clean out the pump. Cant believe so many have problems with these machines. I wish they still made them. Came with my house 2005 MODEL I think. For the past year I get an E04, so I turn to off, wait, then to drain, allow water to drain out and back in business. Today it just STOPPED!!! Will work in Xtra Sanitary and Quick wash but will not spin or drain and door is locked. Holding my clothes hostage. Wondering if I

need a new washer or if it can be repaired, correctly this time It is brushless. everything checks out OK there I opened the drain cover, cleaned up not much in there. Still keep getting the code any ideas Do I need to replace the pump. The clothes are still soaking wet when the code comes up and the washer stops doing anything If the pump is fine, the problem could be excessive suds. If that is not the issue, the pump may have failed. Do you hear it running when the machine is supposed to be draining Why should someone email you the links do you honestly expect other people to put in more effort to solve your problem than you seem willing to put forth Prior to trying these, it started to drain and the cloths were drier. Tried bother suggestions anyways. Thanks for your response You will note, if you read what I posted, that I used names at the start of each paragraph. I questioned Mr. Meyers effort. You, I offered advice a service I am now regretting. Are you that tightly wound, or loosely wound depending on your perspective. If you are asking for help, requesting that others give of their time and effort to assist you, put forth a modicum of effort yourself and actually read the reponses. Tightly wound YOU are the one asking for something and then being snarky. It was your misunderstanding, not mine.

Perhaps you could be grateful for help rather than being a jerk when you are at fault. Ive been sending people the manual when they ask for it for a few years now, and it doesnt bother me at all. I actually hadnt noticed the link had been posted. All the best Does anyone know what this code is and how to fix. It wont agitate or spin. Maybe a service manual I could download.Only one screw catches and screws tight. Does anyone have an idea to fix this. It seems whatever metal piece that the one screw tightens into is not in the other screw locations. You can access them here Any ideas I would be extremely grateful to have a copy of the Bosch self diagnostic book.They all start normal, but we leave then come back 45 mins later and it is frozen at 45 or 56, and it is random where it stops at. But never completes the wash cycle. But sometimes it freezes a second time or more.
