If it hears them, the fax machine takes over the call and receives the fax. If it doesn't hear CNG tones, the fax machine lets the TAD continue playing your outgoing message so your caller can leave you a voice message. If you do not subscribe to Distinctive Ring service You must plug your TAD into the EXT.If your TAD is plugged into a wall jack, both your fax machine and the TAD will try to control the phone line. Connections The external TAD must be plugged into the side of the fax machine, into the jack labeled EXT. The fax machine cannot work properly if you plug the TAD into a wall jack unless you are using Distinctive Ring. The fax machine can work in a roll over system as long as it is the last number in the sequence, so the call cannot roll away. Do not put the fax machine on any of the other numbers;. While it is often relatively simple to connect the fax machine to a key system or a PBX Private Branch Exchange, we suggest that you contact the company that installed your telephone system and ask them to connect the fax machine for you. Do not use cardboard, newspaper or fabric. Fan the stack of paper well to avoid paper jams and misfeeds. Tap the stack of paper so the edges are even. Gently insert the paper. Userfriendly programming helps you take full advantage of all the menu selections the fax machine has to offer. When you enter the menu, the LCD scrolls. Press 1 for Initial Setup —OR— Press 2 for Setup Receive menu —OR— Press 3 for Setup Send menu —OR— Press 4 for Cancel Job menu —OR—. Receive fax messages without pressing the SEMI Fax Start key. Selects size of paper for LETTER fax receiving LEGAL — Sets up your fax machine to poll another fax machine. Automatically sends a NEXT FAX ONLY

programmable cover page or prints a sample coverpage. Set up your fax machine with a document to be retrieved by another fax machine. You can send faxes from memory. —.http://anesaportugal.org/upload/d-link-2000ap+-manual.xml

If you set up the Station ID the date and time displayed by your fax machine will be printed on every fax you send. If there is a power failure, you may have to reset the date and time. Most number keys have three or four letters printed on them.The default factory setting is LOW. When the beeper is on, the fax machine will beep when you press a key, make a mistake or after you send or receive a fax. During a conversation, users can press on the control panel to adjust the volume to LOW or HIGH. When the handset is replaced, the handset volume returns to the default setting of LOW. The volume changes with each key press. The new setting will stay until you change it again. You can choose the mode that best suits your needs. How it works The fax machine FAX ONLY automatic automatically receive answers every call as a fax. If you have extension phones on the same line as the fax machine or subscribe to the telephone company's Distinctive Ring service,. Everyone who is involved in Polling needs to set up their fax machines for Polling. Afterwards, a Sequential Polling Report will be printed.The Brother fax machine has a Distinctive Ring feature that allows you to use your machine to take full advantage of the telephone company's Distinctive Ring service. The new phone number on your line can just receive faxes. Some ring patterns cannot be registered. The ring patterns below are supported by the Brother machine. Register the one your telephone company gives you. Ring. You will need to set the Receive Mode again. See To select or change your Receive Mode on page 52. Caller ID The Caller ID feature lets you use the Caller ID subscriber. Manual dialing Press all of the digits of the phone or fax number. OneTouch dialing Press the OneTouch key of the location you want to call. If the LCD shows NOT REGISTERED when you enter the OneTouch number, a number has not been stored for it. The ADF can hold up to 10 pages, feeding each one individually through the fax machine.

Insert the document face down in the ADF. Pick up the handset and listen for a dial tone. —OR— Press Hook listen for a dial tone. Enter the fax number you want to call. The fax machine starts scanning the first page. Fax resolution When you have an document in the ADF you can use the Resolution key to change the setting temporarily for this fax only. Canceling a scheduled job You can cancel a fax job that is stored and waiting in memory. Your cover page includes the name or number stored in the OneTouch or SpeedDial memory. If you are dialing manually, the name is left blank. Press Fax Start. The fax machine stores the document in memory, and then transmits it to all the numbers you entered. The other fax machine will ring as if it were receiving a telephone call; if the other party picks up the handset, your machine will ring. Insert the document face down in the ADF.This way, you don't have to wait for the entire fax to be transmitted before you retrieve your document. However, you cannot use automatic redial or the Menu mode. When you dial a quickdial number, the LCD shows the name, if you stored it, or the number. The fax machine can store 100 SpeedDial numbers.You can use the handset to make calls. When you dial a quickdial number, the LCD shows the name you've stored, or if you haven't stored a name, the fax number. If you pressed Hook to dial the call, pick up the handset when the other party answers. The speaker works only one way; the other party won't be able to hear you unless you pick up the handset. To hang up a voice call, replace the handset. When you hang up, the fax machine will return to the Pulse dialing service. 7 7 QuickDial numbers and dialing options. This activates your pager so you will know that you have a fax message in the memory. You will be able to retrieve fax messages from another location using the Remote Retrieval commands.Be sure to cut out the Remote Retrieval Access Card on the last page and keep it with you at all times.

Visit us at Brother reserves the right to make changes without notice in the specifications and materials contained herein and shall not be responsible for any damages including consequential caused by reliance on the materials presented, including but not limited to typographical and other errors relating to the publication. You are then expected to pack the Machine that Brother agreed to replace in the package from the replacement Machine and return it to Brother using the prepaid freight bill supplied by Brother in accordance with the instructions provided by Brother. Operation of. WARNING There are high voltage electrodes inside the fax machine. Before you clean the fax machine, make sure you have unplugged the telephone line cord first and then the power cord from

the AC power outlet. Enter the fax number you Enter a number up to 20 want to call. Press to search the memory. Press Fax Start, when the LCD shows the name you want to call. Special fonts identify keys you should press, messages that appear on the LCD, and important points or related topics. Bold Bold typeface identifies specific keys on the fax machine control panel. This will check that your fax machine is working properly. Name Description Telephone Line Cord Connect the fax machine to a telephone wall jack. Dial Pad Use these keys to dial telephone and fax numbers and as a keyboard for entering information into the fax machine.Lets you access the menu to program and store your settings in the fax machine. Press to scroll forward or backward to see a menu selection. If you have Voice Mail on the phone line where you will install your new fax machine, there is a strong possibility that Voice Mail and the fax machine may conflict with each other while receiving incoming calls. These are quiet, intermittent beeps every 4seconds. You'll hear them after you dial and press Fax Start and they will continue for about 60 seconds after dialing.

During that time, the sending machine must begin the "handshake". Connect the telephone's line cord to the jack labeled EXT.Extension Telephone External. Connections The external TAD must be plugged into the side of the fax machine, into the jack labeled EXT. The fax machine cannot work properly if you plug the TAD into a wall jack unless you are using Distinctive Ring. You may try omitting this pause, but if the fax machine has trouble receiving, then you must rerecord the OGM to include it. The most common connection is to put the fax machine on Line 2, which is explained in the following steps. While it is often relatively simple to connect the fax machine to a key system or a PBX Private Branch Exchange, we suggest that you contact the company that installed your telephone system and ask them to connect the fax machine for you. Keep the paper flat and away from moisture, direct sunlight and heat.Fan the stack of paper well to avoid paper jams and misfeeds. Tap the stack of paper so the edges are even. Gently insert the paper. Userfriendly programming helps you take full advantage of all the menu selections the fax machine has to offer. Since your programming is done on the LCD, we have created stepbystep onscreen instructions to help you program the fax machine. If you set up the Station ID the date and time displayed by your fax machine will be printed on every fax you send. If there is a power failure, you may have to reset the date and time. The telephone number will appear only on cover pages and call back messages.To enter a space in the name, press twice between characters. Making corrections If you entered a letter incorrectly and want to change it, press move the cursor under the incorrect character.The default factory setting is LOW. When the beeper is on, the fax machine will beep when you press a key, make a mistake or after you send or receive a fax.During a conversation, users can press on the control panel to adjust the volume to LOW or HIGH.
